About

I am a research scientist and team lead at NAVER Cloud, working on large-scale foundation models. My research focuses on understanding how pre-training, model architecture, and data shape the learning dynamics and capabilities of Transformer models. My work spans foundation model pre-training, multilingual and multimodal learning, and model compression. I aim to bridge fundamental research and large-scale model production, turning empirical insights into more efficient AI systems.

Work Experience

NAVER Cloud

Dec.2021 - Present

NAVER's cloud and AI company, building the HyperCLOVA X foundation models and NAVER Cloud Platform.

Foundation Research, Team Leader

FOCUS AREAS

- **LLM Fundamental Research** — Pre-training dynamics & Transformer architecture [1, 2, 3]
  - (Early 2026) Designed the team's first mid-training stage, introduced it into model production, and established it as a process continuously applied in production.
  - Pathfinding of HyperCLOVA X modeling (Technical Report: 2024, 2025, 2026)
- **Korean Expert Development** — In charge of improving the Korean-language capabilities of HyperCLOVA X. [8, 11, 13, 17]
- **AudioLLM Mission** — Project Manager for the development of duplex and interaction models. [12, 14, 15]

EARLIER WORK

- (2025) Omni-foundation models and multilinguality of large-scale Transformers [9]
  - Served as Mission Lead for Omni-Pathfinding.
- (2021–2023) Model compression & quantization [4, 5, 6, 7]

PROMOTIONS

Team Leader 2025
Foundation Research Team, Hyperscale AI Division

Technical Leader 2024
Foundation Research Team

Technical Leader 2023
Hyperscale AI Efficiency Team

LG Energy Solution
Nov.2020 - Nov.2021

Business Strategy, Data Scientist

Nepes
Jan.2018 - Oct.2020

Future Intelligence, Researcher

- Military service (South Korea).

Education

Ph.D. in Artificial Intelligence
Mar.2025 - 2027 (expected)

Korea Advanced Institute of Science and Technology (KAIST)

Advisor: Prof. Jinwoo Shin

Alongside my full-time role at NAVER Cloud, I am pursuing a Ph.D. in AI at KAIST under Prof. Jinwoo Shin, supported by a NAVER Cloud grant.
